

**Leydon Restorations, LLC**

**PO Box 127, Lahaska, PA 18931, USA**

## **Automotive Restoration Mechanic / Fabricator**

Established automotive restoration shop with a focus on the mechanical restoration of high-end pre and post-war European marques is seeking an experienced technician with an emphasis on fabrication and welding to join our team.

Ideal candidate would possess the following experience or skills:

- At least five years experience in the automotive repair or restoration field.
- Strong fabrication experience in a variety of materials.
- Strong welding and brazing experience, including casting repairs.
- Proficiency in the repair/restoration of basic automotive systems and their components.
- Proficient in basic inspection and measuring processes.
- Strong planning and documentation skills.
- Cleanliness and extreme attention to detail.
- Ability to manage multiple projects concurrently.

Additional beneficial skills include:

- Race chassis fabrication and setup experience.
- Proficiency in manual machining operations including milling, turning, and grinding.
- Knowledge of metallurgy and treatment processes.
- Bodywork and painting experience.

Located on a beautiful and historic farm setting in Bucks County, Pennsylvania, our shop is a small, well equipped, team oriented workplace with a friendly, low stress atmosphere. We have a forty year history of performing uncompromising work on some of the most challenging restoration projects from around the world.

Benefits include paid vacation, company subsidized health care and SEP IRA with employer match.

Please send resume, portfolio of work if available, and references to:
