## COMPANY PROFILE & HISTORY

Seven LLC is a private car collection management company whose philosophy is to preserve our automotive past for future generations. At the core, we focus on the preservation, curation, and general management of collections around the world. The company started when the company founder, Ted Hersey, sought to pursue his passion for automobiles in 2000. Knowing that he enjoyed detailing and repairing cars, he began to detail the cars of friends and family. The network grew by referral over the coming years and included the high end and vintage collector vehicles he always sought to work with. By the end of the third year in business, the company had grown to include full time and part time staff.

The business began to take on much more than just detailing cars. The company was tasked with managing entire collections, evaluating potential acquisitions, ordering parts, managing restorations and showing cars to contribute to their provenance. By 2009, the company had grown to serve collectors as far away as California and was showing vehicles at every major concours including Pebble Beach and a Best of Show at Cavallino.

Over the years, the clients who saw the greatest value in the services, and the company saw the greatest profitability was when the company understood why the client collected cars in the first place, which enable Seven to better support that reason and provide experiences to further the client's engagement with their vehicles. These reasons were evaluated and placed into seven major categories and thus, in January 2010, the name Seven became the standard and the new brand.

Today, Seven holds the distinction of being the nation's first and oldest Collection Management and Curation company. Pursuing excellence in all things remains the standard from which every member of the team approaches each client, vehicle or task before them. Holding the exclusive contract for preparation and logistics with Gooding & Co. Auctions, pushing to develop the best practices for management, conservation and preservation of vehicles, winning more awards at major Concours than any other company remain hallmarks of the brand. Seven continues to grow 100% from the referral of satisfied clients and is proud to have never had to advertise or market towards its success.
