

Chassis Fabricator

We are looking for an additional full-time chassis fabricator, building hot rods, customs, and race cars. Includes building frames from scratch for early hot rods all the way up to full unitized construction race cars (drag and road racing).

Requirements include:

- Ability to read blueprints
- TIG (a welding test will be part of the interview process)
- A vision to "see" the finished project as you go along
- Can think for themselves
- Passionate about building hot rods
- Detail oriented
- Good work ethic as well as integrity
- Passion for obsolete and advancing technology
- Love of hot rods, performance cars and customs
- Employee will supply their own hand tools to compliment the tools used within the shop.

Former Military personnel are also highly encouraged, especially those with aircraft fabrication AFSC/MOS/Rate.

Send resumes to tiny@hotrodchassisandcycle.com or fax to 630.458.0810. INCLUDE a brief cover letter detailing why you think you have what it takes to build hot rods and race cars.
